Key Note Speech

**Hon. James Rege, MP, Chair , and Parliamentary Committee on Energy,
Communications and Information: Role of MP's on IGF.**

10:30 – 11:00 am Cloud Computing

- Technical (Dorcas Muthoni)** what are the critical issues in determining the pace and level of development of the cloud ?
- Industry (Phares Kariuki)**The cloud being inherently global and with the ever evolving technology and applications, what are the policy and regulatory challenges and solutions that would be flexible adaptable and cross jurisdictional and that will aim at promoting investment and innovative use for development?
- Consultancy (Sam Aguyo)** What are the policies, legal and regulatory challenges and how can they be addressed in order to promote innovation and investment?
- Public (Paul Kukubo)** How can the challenge of cross-jurisdictional cloud computing services be addressed?

11:00 – 12: 00 Mobile Internet

- ☒ **Industry (Safaricom-Nzioka Waita)** What role will mobile networks play in providing Internet access to developing country citizens and what needs to be put in place to promote mobile Internet and enhance local content development?
- ☒ **Regulator (CCK)** What initiatives are needed to ensure that sufficient spectrum is available for mobile networks to provide effective Internet access for various services?
- ☒ **Consumer issues (Cofek Stephen Mutoro)** Mobile payments platforms continue to offer tremendous amount of services and innovation, with the ability to exchange, transmit and store data and content embedded within payments systems. What are the challenges in balancing consumer protection and regulatory oversight? Particularly regarding privacy and ownership of information/content and data.
- ☒ **Technical (Jessica Collaco)** What is the role of policy and regulation for successful transition to new and innovative mobile services, including mobile payments and electronic commerce?

12.00-13.00 Cyber security and Privacy

- ☒ **Microsoft (industry)** Threats youth and children face online become more complex and multifaceted, the legal, technical and institutional challenges emerging in cyberspace related to the protection of children become even more global and far-reaching. It is certain that we need to address the creation of a better and safer Internet world for our children so that they may fully enjoy the benefits of the Internet.
- ☒ **CCK (Public Sector)** What is required to increase and improve international co-operation in this area and to ensure that national and international strategies are consistent with policies that protect society while advancing innovation, growth and development?
- ☒ **Warigia Bowman(Civil Society)** Freedom of Information and Cyber Security, the role of state and non state actors.

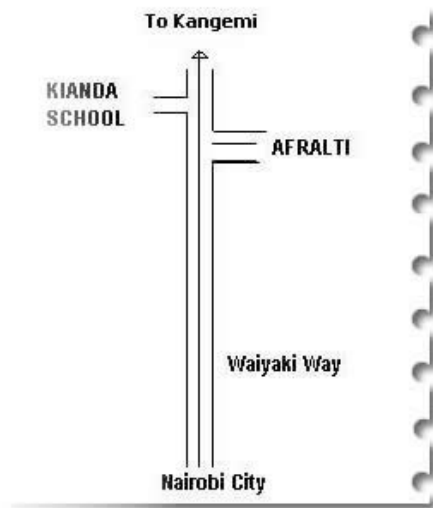

14:00 – 15:00 Broadband for development

- ☒ **Public (CCK)** What are the opportunities and challenges of the new converged broadband environment, and how do we ensure the opportunities offered by the new international bandwidth become a reality (Universal Affordable access?) .
- ☒ **Industry (Tespok)** : What can be done to enhance the impact of access to broadband for development?
- ☒ **Civil Society (Catherine Adeya)** : What public policy initiatives and incentives are needed to stimulate investment in high-speed broadband to achieve universal access?

Development Partner:(Edith Adera) How can governments and other stakeholders leverage policies and investment in health, education, energy and other sectors to enhance societal benefits provided by high speed broadband?

15:00 – 16:00 Emerging Issues (Open Data, New gTLD's, Politics and Social Media, UN-IGF 2011
