**TO WHOM IT MAY CONCERN**

Dear Sir/Madam

**RE: INDUSTRIAL ATTACHMENT – KASILI N. FIONA - TLE/04/14**

The above named person is a fourth year student of the Department of Electrical and Communications Engineering and is expected to proceed for industrial attachment between 1<sup>st</sup> May 2017 and 30<sup>th</sup> August 2017 according to the requirements for the Bachelor of Engineering programme of Moi University.

In this regard, we are kindly requesting you to offer the student a chance to be attached to your organisation's/company's electrical, electronics, computer and/or communications sections for this twelve weeks' period.

If this is acceptable to you the departmental teaching staff will pay two one-day visits to assess the student's performance during the attachment period. The university undertakes a group insurance cover for all our students on industrial attachment and you will be given copies of the insurance certificate by the student when he reports for attachment.

I wish to thank you for the support you have given us in the past years.

Yours faithfully,

Department Of Electrical &  
Communications Engineering  
MOI UNIVERSITY
