**RE: African Internet Exchange Point Workshop, Nairobi 2<sup>nd</sup> – 3<sup>rd</sup> February 2006**

The African Internet Service Providers Association is the umbrella body representing national ISP Association within Africa on a continental level. The Association organises, coordinates and promotes activities that increase the capacity of member Associations and individual ISPs to function more efficiently and collaborate more effectively to strengthen Africa's Internet.

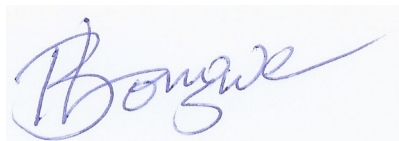

Among AfrISPA's objectives is the commitment to provide and promote educational opportunities that will enhance and empower technical and policy understanding of the Internet as well as to build, maintain, and publish relevant industry data for Members. To this end AfrISPA has been involved in the development of a system that facilitates the analysis of Internet Exchange Points and their impact on traffic flows at a national, regional and eventually continental level.

AfrISPA is pleased to invite you to participate in the opening ceremony for the 1<sup>st</sup> African Internet Exchange Point Research Workshop and witness a demo of the system. The event takes place in Nairobi from the 2<sup>nd</sup> to the 3<sup>rd</sup> of February 2006.

Please confirm your attendance as soon as possible to facilitate all necessary arrangements. For any information regarding the workshop please contact Hilda via the secretariat in Nairobi on [hilda@inhand.co.ke](mailto:hilda@inhand.co.ke) or telephone +254 20 3747142 or Mobile +254 725 116606.

We look forward to sharing this opportunity together.

Warm Regards,

For the African Internet Service Providers Association  
Brian Longwe  
**General Manager**
