Swift Intellect Limited
Panelist

James Smart
Moderator

Information and communication technologies play a critical role in the administration and organization of modern elections. The use of digital technologies has grown to encompass the entire electoral process. The aim of the webinar is to explore the key ICT issues around elections in Kenya. We will examine the state of ICT preparedness of key institutions and demystify the digital expertise, processes, and infrastructure that can be used to deliver a successful election in Kenya. We will highlight issues that should be on the national agenda around the state of ICT preparedness of key institutions towards the holding of credible elections in 2022.
