

Digital Infrastructure and Data for Elections in Kenya

**Venue: The Emory Hotel,
Kandara Rd, Kileleshwa**

DATE

23 Feb 2022

TIME

09:00 - 13:30 EAT

Speakers:

Speakers at the conference include representatives of key ICT sectors, critical infrastructure providers, data scientists, cybersecurity experts, as well as representatives of media organisations, civil society, and government. The conference speakers include:

- ✓ Barrack Otieno, Africa Top Level Domains Organisation
- ✓ Fiona Asonga, Technology Service Providers of Kenya (TESPOK)
- ✓ Churchill Otieno, Nation Africa
- ✓ Dan Kwach, Africa Data Centres
- ✓ Monica Nthiga, Humanitarian OpenStreetMap Team
- ✓ Timothy Oriedo, Predictive Analytics Lab
- ✓ Grace Githaiga, Kenya ICT Action Network (KICTANet)
- ✓ Patrick Gathara - The Elephant
- ✓ Jones Baraza, Swift Intellect Limited
- ✓ Kwamchetsi Makokha, Journalists for Justice

Information and communication technologies play a critical role in the administration and organization of modern elections. The use of digital technologies has grown to encompass the entire electoral process. The aim of the conference is to explore the key ICT issues around elections in Kenya. We will examine the state of ICT preparedness of

institutions and demystify the digital expertise, processes, and infrastructure that can be used to deliver a successful election in Kenya. We will highlight issues that should be on the national agenda around the state of ICT preparedness of key institutions towards the holding of credible elections in 2022.

Join Us!

The Conference will be streaming on the
JFJ Facebook and Youtube pages:
